IDU Biometrics

1400 Employee's

The Little

The IDU unit is an autonomous device housed in an aluminum cast with the following dimensions. This unit can store 1400 fingerprints with personal text related data for each enrolled person and if time and attendance device up to 26,000 date and time events can be stored on the unit. The device has a unique MAC address as well as a configurable IP address structure to suit your network. Simply connect the device to your network like any other peripheral device e.g. desktop computer. An Access Control and Administration Tool is provided with the Bio-IDU. This tool allows for access and administration of the various IDU devices on a network.
